

B.G OFFSHORE ENERGY LIMITED

COMPREHENSIVE CORPORATE PROFILE 2026

1. EXECUTIVE SUMMARY & CORPORATE OVERVIEW

B.G Offshore Energy Limited is a premier, indigenous Nigerian energy services and engineering firm, strategically positioned to deliver integrated, solution-driven operations across Africa's dynamic oil and gas sector. Incorporated in July 2020 (RC: 1686068), the company has rapidly evolved into a trusted partner for upstream, midstream, and downstream operations.

Driven by a commitment to operational excellence, we leverage deep technical expertise, robust regulatory compliance, and a modern fleet of specialized equipment to execute high-stakes projects. Our service delivery model is rooted in international best practices, ensuring that every project is executed safely, on time, and within budget, thereby maximizing asset value for our diverse corporate clientele.

2. CORPORATE PHILOSOPHY

- **Vision:** To be the undisputed leading player in integrated service delivery across the global energy and marine sectors, recognized for technological innovation and unparalleled reliability.
- **Mission:** To consistently provide highly reliable, sustainable, and value-driven energy solutions in our areas of operation, fostering long-term partnerships through unmatched service quality.
- **Core Values:** Safety First (Zero Harm), Uncompromising Quality, Unwavering Integrity, and Collaborative Teamwork.

3. CORE OPERATIONAL CAPABILITIES & SERVICES

We provide an expansive suite of industry-based services, engineered to solve complex logistical, engineering, and environmental challenges.

A. Marine & Offshore Logistics Solutions

Our marine division provides comprehensive, turnkey fleet and logistics services critical to offshore exploration and production.

- **Vessel Chartering & Fleet Management:** Provision and management of specialized tonnage, including Anchor Handling Tug Supply (AHTS) vessels, Diving Support Vessels (DSV), Survey Vessels, and highly manoeuvrable Platform Supply Vessels (DP1 & DP2).
- **Barge & Offshore Accommodation Operations:** Deployment and operation of heavy-duty Work Barges, Pipe-Laying Barges, and fully equipped House Boats to sustain long-term offshore campaigns and personnel welfare.
- **Marine Security & Logistics Support:** End-to-end maritime transportation logistics, advanced marine security escort services, and professional mooring and unmooring operations for deep-water installations.

B. Pipeline Construction & Heavy Engineering Services

Led by engineers with decades of cumulative experience, we execute rigorous fabrication and structural installations.

- **Onshore & Offshore Pipeline Engineering:** Certified design, laying, fabrication, and continuous maintenance of oil and gas transmission pipelines. We manage everything from right-of-way clearing to final hydro-testing and commissioning.
- **Structural Fabrication & Installation:** Precision engineering and sectional replacement of critical piping, alongside the complex fabrication of steel jackets, driving piles, and comprehensive offshore platform construction.
- **Civil & Industrial Building Works:** End-to-end design and structural construction management for large-scale industrial facilities, including heavy-duty warehouses, processing factories, and customized residential housing for field staff.

C. Dredging & Environmental Remediation

We champion sustainable environmental stewardship alongside our heavy industrial capabilities.

- **Capital & Maintenance Dredging:** Specialized dredging of oil well locations, strategic channel enlargement to accommodate heavy drilling rigs, robust shoreline protection

infrastructure, and extensive sand reclamation projects.

- **Environmental Restoration Services:** Scientific cleanup and systematic restoration of hydrocarbon-contaminated sites. We deploy advanced techniques for soil and groundwater remediation to meet stringent environmental standards.
- **Hazardous Waste Management & Spill Response:** Comprehensive onshore and offshore waste management protocols, coupled with rapid-deployment oil spill emergency response and containment strategies.

D. Water Engineering & Field Support Services

Ensuring resource availability and seamless production continuity at remote and central installations.

- **Advanced Water Engineering:** Geotechnical design and drilling of deep-water boreholes, turnkey construction of high-capacity water treatment plants, and the implementation of solar-powered piping and distribution networks for sustainable industrial and community use.
- **Hydrocarbon Field Support:** Specialized wellhead maintenance services, heavy-duty equipment leasing, routine mechanical repairs, and robust minor engineering support directly facilitating uninterrupted hydrocarbon production.

4. STATUTORY COMPLIANCE & INDUSTRY CERTIFICATIONS

B.G Offshore Energy Limited operates with uncompromising adherence to federal regulations, ensuring seamless project approvals and stakeholder confidence.

Regulatory Body / Authority	Compliance Status & Details
NUPRC (Dept. of Petroleum Resources)	Holds active, major category permits for Onshore Pipeline Laying, Special Marine Transportation, and Heavy Fabrication.
NCDMB (Nigerian Content)	Fully registered and verified on the NOGIC JQS platform as a certified indigenous service company.
FIRS (Taxation)	Registered VAT Collection Agent. Valid Tax Clearance. TIN: 22627883-0001.
ITF, NSITF & PenCom	100% compliant with Industrial Training Fund, Employees Compensation Act, and Pension Reform Act remitted contributions through the current fiscal cycle.

5. ORGANIZATIONAL STRUCTURE

To guarantee results-oriented autonomy and efficient delivery across diverse locations, our corporate structure is lean, agile, and highly specialized.

- **Executive Board & Directorship:** Headed by the Chairman/CEO, providing strategic foresight, corporate governance, and financial oversight.
- **Senior Management:** Includes the General Manager, Business Development Manager (BDM), and centralized Operations/Logistics Management, driving daily corporate efficiency.
- **Technical & Quality Assurance Teams:** Comprises highly certified Project Managers, QA/QC Engineers, and Health, Safety, and Environment (HSE) Managers.
- **Field Execution Personnel:** Specialized offshore crew, skilled tradesmen, and autonomous mobile productivity teams capable of delivering robust results directly from remote assets.
